

WEEKLY NEWSLETTER NO. 42

May 22, 1957

We had our first visit from a FOG representative yesterday
25X1A9a
in the person of [REDACTED] who was here on contract matters.

We received reports from all our field representatives this
25X1A9a
week. [REDACTED] returned to Detachment B on May 9, having checked
25X1A9a
out the units at A in [REDACTED] absence. He reports that equipment
at both detachments are in tip top shape. We received word from Head-

25X1A9a
quarters that [REDACTED] arrived safely on May 12. He has a week's
vacation before returning to work at his detachment. [REDACTED] 25X1A9a
wrote us on 13 May reporting that there is much activity and many shots
being taken with good results. I believe C is the only detachment without
6" diameter glass lenses. Jim has requisitioned these from supply but
25X1A9a
has received no word yet. [REDACTED] is enjoying a brief respite
while activity at the Ranch has been suspended.

Unit No. 19 was shipped to [REDACTED] 25X1A6a
Warehouse A on 20 May.
No. 7 is now in calibration and will be shipped within the next 24 hours.
Unit No. 11 arrived at our plant yesterday from Detachment B. This
unit requires a complete overhaul and will be returned to the [REDACTED] 25X1A6a
Seven remaining sextants and 19 Mark III handles are nearing the end of
the production line, and all should be in the shipping stage by the end of
the month.

Until next week.

Jack
